**Examinee Summary**

✕ Export

Examinee	% Score	Raw Score (?)	# Correct (?)	Completed
All-class, Dorothy	81.36%	48 / 59	48	2015-05-31 00:00
Classes, Mike (589703)	74.58%	44 / 59	44	2015-05-31 00:00

**Score Range** will show graphs of the scores; these graphs can also be exported to an Excel spreadsheet:

**Outline Breakdown** shows each topic and subject associated with the outline used with the assignment; this can be exported to an Excel spreadsheet:

Clicking the box next to the name, topic, or subject will check the box. If **Hide all but checked** is clicked, only the checked boxes will show.

The outline is broken down into 3 colors: green, red, and orange. Green bars display scores 75% and higher, orange bars shows scores between 66% and 74%, and red shows scores 65% and lower.

Clicking the title of any part of the outline will show how the examinee has done in a particular section of an outline:

**Item Analysis** will provide a breakdown of each question item and the total percentage of examinees that got the question correct; by clicking the Question Identification Number (QID), you will be able to see the question being referenced. By clicking the **Abridged View**, you will be able to print a smaller version of this report. Clicking **Rebuild Report** will refresh the report to reflect any updates (rekeys or score changes):

### Rekeys

[Revert to Original](#)

Rekeying the exam will affect all users who have taken the exam.  
It may take several minutes for all scores to update when rekeying an exam.

Item #	QID	Type	Points	Rekey	Rekey Status
1	303753	Multiple Choice	1	New	
2	302483	Multiple Choice	1	Edit	Omitted

1. Click **New** to rekey an item

### New Rekey

**Case:**

A 26-year-old woman, gravida 2 para 2, with a past medical history of *Chlamydia* cervicitis and recurrent vulvovaginitis has given birth to her third child via Cesarean section. She is status-post delivery 24 hours, and the duration of labor was 20 hours. She presently reports that she feels "warm and feverish," has a malodorous vaginal discharge, and has a 6-hour history of achy lower abdominal pain. She denies dysuria, pyuria, urinary frequency, change in urinary odor or color, shortness of breath, chest pain, hemoptysis, nausea, vomiting, and diarrhea; she also denies any drug allergies. Her physical exam is remarkable for a fever of 100.9°F with the remainder of her vital signs normal. Additionally, she has a soft but tender lower abdomen that has noted swelling, frank pain in the lower abdomen/pelvis, and a foul, white lochia is noted. The Cesarean section incision site is well-approximated and without induration, discharge, or erythema; there is no costovertebral tenderness, adnexal masses, or peripheral edema appreciated.

**Stem:**

What is the most appropriate first-line treatment of this patient at this time?

A. Oral trimethoprim-sulfamethoxazole DS

B. Parental clindamycin plus gentamicin

C. Parental ampicillin

D. Parental dicloxacillin

E. Parental ciprofloxacin plus doxycycline

Accept all?

Omit?

[Rekey Exam](#)

The original answer choice will be checked for the question.

2. Check the box for the new answer choice and uncheck the box for the original option.

If selecting all answer choices, check the **Accept all?** box.

If you are omitting the question, check the **Omit?** box.

3. Click **Rekey Exam** when complete to save your changes.

The popup window will disappear and the original assignment report screen will appear with only the Rekey option checked and showing.

\*The **Item Analysis** will not be effected by the rekey, but the score will change to reflect the rekey under **Summary**.
