

Introducing

Self-Directed Assessment and Review for ABFM

Engage Your Residents Build Their Confidence

Exam Master's new Self-Directed Assessment and Review for ABFM is built on our Continuing Education platform which gives your residents control and engagement with their learning activity. This program is completely "plug and play" and provides detailed outcomes for both the residents and the program.

Program Includes

Residents can take one or all of these ***eight*** 40-question ABFM Domain exams:

- ▶ Ambulatory Family Medicine
- ▶ Emergent/Urgent Care
- ▶ Hospital Medicine
- ▶ Geriatrics
- ▶ Sports Medicine, etc.

Residents can take a **280-Question ABFM Practice Board Exam**

- ▶ Mapped to ABFM 2017 test plan (three 80-question blocks and one 40-question block)

Special Features

- » Choose how long students have access to each exam, up to 60-days
- » Choose what is considered a passing score required for residents to complete the activity.
- » Option to have the residents receive a certificate of completion.
- » Requires no special training or software to install.
- » Detailed explanations for each question.

Program Benefits

- ▶ Provides your residents with realistic practice covering the same topics as the ABFM.
- ▶ Residents receive thorough feedback as to what they answered correctly and incorrectly.
- ▶ Pre-test and post-test comparison helps residents measure progress and build confidence.
- ▶ Programs provide a structured activity for their residents to help them prepare in a way that is fun and meaningful.

How Residents Access the Family Medicine Self-Directed Assessment

ABFM Pre-Test Example

Residents take one of the ABFM Domain exams or one of the Family Medicine Practice Board Exams as a pretest. All questions are mapped to the ABFM topic areas. System enables residents to record notes, mark questions for later review, as well as highlight and strike out text to help them focus on key information. Residents receive scoring feedback at the end of the exam.

The screenshot shows the 'User CME Exam' interface. At the top, there is a navigation bar with 'User CME Exam' on the left and 'Test User', 'Messages 0', 'Settings', and 'Logout' on the right. Below the navigation bar, a light blue notification box states 'Your CME Exam is ready.' with a close button. A dark blue progress bar contains four icons: a document with a checkmark, a magnifying glass, a document with a pencil, and a certificate. Below the progress bar, the steps 'Pre-Test', 'Review Results', 'Post-Test', and 'Get Certificate' are listed, with 'Pre-Test' highlighted in green. The main content area is titled 'Family Medicine Certification Practice Exam' and features a stethoscope icon, the text 'Family Medicine Certification Practice Exam', and a 'Take Pretest' button. Below the icon, it says 'Questions: 280'.

Review Results

After pre-test has been completed, residents can review their high-level results and can also view diagnostic feedback by subject and topic to identify needed areas of remediation, prior to them retaking the exam.

The screenshot shows the 'Review Results' interface for the 'Family Medicine Certification Practice Exam'. The progress bar now highlights 'Review Results' in green. The main content area displays four circular progress indicators: 'Total exam score (Max score 40)' at 85, 'Raw exam score (Max score 40)' at 34, 'Correct questions (Out of 40)' at 34, and 'Answered questions (Out of 40)' at 40. To the right of these indicators, there is a list of instructions: 'Pre-Test complete.', 'Complete required review of incorrectly answered questions.', 'Click 'Finish' when you finish your review.', and 'Click 'Pause and Exit' to exit and resume later'. Below the list is a link for 'View Topical Breakdown'.

How Residents Access the Family Medicine Self-Directed Assessment

The screenshot displays the 'Family Medicine Certification Exam' interface. On the left, a sidebar lists questions 17 through 29. The main area shows 'Question 17 of 50' with options: Mark, Note, Flashcard, Calc, and Labs. The question text reads: 'You can select text in the case or question to highlight it. Case: A 55-year-old retired professional football player presents to your office with bilateral knee pain. The patient reports a history of hypertension and peptic ulcer disease. The patient stands 6'5" and weighs 325 lb. On examination, you note bilateral knee joint effusions and crepitus on passive movement. There is also bony enlargement at the distal interphalangeal joints of the hands bilaterally. Lachman's test is negative on examination, and the X-ray report reveals joint space narrowing, osteophyte formation, and femoral subchondral cyst formation in both knees. Upon further questioning, the patient states that his knee pain has not limited his mobility yet. Question: At this time, what therapeutic recommendation would best prevent progression of this patient's disease?' On the right, 'Answer Choices' are listed: 1. Weight reduction, 2. Anterior cruciate ligament repair, 3. Oral prednisone, 4. Total knee replacement, 5. Methotrexate, 6. Tumor necrosis factor inhibitor. A 'Submit Answer' button is at the bottom right.

ABFM Post-Test

After residents have performed self-directed refresher/remediation based upon their exam results they will retake the exam again with all test questions jumbled into a new order. Once a minimum score is achieved (as determined by the institution) residents have completed the program and can receive a certificate of completion.

The screenshot shows the 'Completed CME Exams' dashboard. It features four cards, each representing a different exam category with a circular progress indicator showing the total score percentage and a 'CME Certificate' button below it. The categories and scores are: Ambulatory Family Medicine (96%), Emergent/Urgent Care (96%), Hospital Medicine (100%), and Family Medicine Certification Practice Exam (98%).

Exam Category	Total score (%)	CME Certificate
Ambulatory Family Medicine	96	Yes
Emergent/Urgent Care	96	Yes
Hospital Medicine	100	Yes
Family Medicine Certification Practice Exam	98	Yes
